

CNI  
NeuroHealth Center  
Outcomes Report  
2007

**Submitted by**  
Ellen Belle MA, PT

There were a total of 66 patients seen at the NeuroHealth Center in 2007. Of these 36 (55%) were new patients. The type and breakdown of therapy sessions per patient are as follows:

- PT sessions - 694  
Average number of PT visits per patient - 16.1
- OT sessions - 459  
Average number of OT visits per patient - 12.0
- ST sessions - 317  
Average number of ST visits per patient - 9.3
- Social service sessions - 129  
Average number of social service visits - 1.9

A total of 49 (74%) of these patients were discharged from the NeuroHealth Center for reasons listed below.

- Goals Met/mostly met 51% (25)
- Moved from area 4% (2)
- Obtained insurance 6% (3)
- Did not continue 33% (16)
- Additional other illness 2% (1)
- Additional CVA 4% (2)

**Goals met for those discharged in 2007**

	20%	40%	60%	80%	100%
PT	3	1	7	5	11
OT	8	1	8	0	9
ST	6	3	3	2	12

**Patient Satisfaction**
